

ADVANTAGES

To clean the windscreen sufficiently to provide suitable visibility at all times

Low cost, simple and less maintenance

User can set time and frequency for the operation

It Indicates in LEDs so operation will be easy and its user friendly

The indication LEDs are used in different colours so we can easily understand the position

DISADVANTAGES

The frequency changes on every alternate key press

The same frequency range are not used for single set of operation

The start led will not on when the button is pressed, hence the response time is more
